

PARKER

Magnetic Particle Inspection Instruments

The **B200 Contour Probe** is a rugged, high performance instrument for magnetic particle inspection. This unit includes Parker's original flexible leg design that allows the field to be "focused" at a precise area of inspection. All the power and durability of the original B100, the B200 was designed with operator comfort in mind. Dual coils reduce outward heating and maintain a powerful AC field. A slim-line ergonomic handle and oversized operating switch provides a comfortable grip, and is ideally suited for lengthy inspection applications.

- Handheld AC Magnetic Yoke
- Powerful AC Magnetic Field
- Units are available in 115 VAC
- Slim-line Ergonomic Handle
- Oversized Operating Switch
- Lightweight
- Durable Molded Construction
- Totally Repairable
- One-Year Guarantee
